

WHITE PAPER LIGHT

SAVE TOKEN

Introducing the first buy-back smart contract for cryptocurrency

www.saveinvest.io

Introduction

Problems faced by investors in cryptocurrency:

The main obstacle that potential cryptocurrency investors face is the uncertainty of its value, which suffers significant fluctuations over a short time (even day to day), being highly vulnerable to market news or rumors. This causes potential investors to see such investments as high-risk ones, especially considering threats such as countries banning or tightly regulating cryptocurrency which may lead to a collapse of the cryptocurrency.

Our solution:

The SAVE buy-back contract covers the risk that your cryptocurrency collapses. You pay a % of your investment to have it covered for one year and if the cryptocurrency you bought goes below a certain percentage of its initial value, you recover 100% on your initial investment, as described below.

We introduce a new concept, the coverage of your investment in cryptocurrency:

A BUY-BACK SMART CONTRACT IN CRYPTOCURRENCY.

How the SAVE buy-back smart contract works

By creating a SAVE buy-back smart contract, you keep your cryptocurrencies safe. If it goes below a certain percentage of its initial value, the contract will automatically buy-back the coins from you at the exact initial value.

For example: you have 1 Z coin and create a buy-back contract while $1 Z = 100$ and agreed percentage for buyback is 2% (percentage may differ for each coin). In case in which 1 Z will value less than €2 for more than 30 days, the buy-back smart contract will automatically offer to buy the 1 Z from you at the €100 value.

The SAVE tokens will be needed for the creating the buy-back contract, which will cost 7% of the value you want to cover. Out of the 7%, 5% will need to be paid in fiat money (EURO) and 2% in SAVE coins, hence creating a need for buying SAVE coins, which can be done either during the ICO at a special price, or from the market post-ICO.

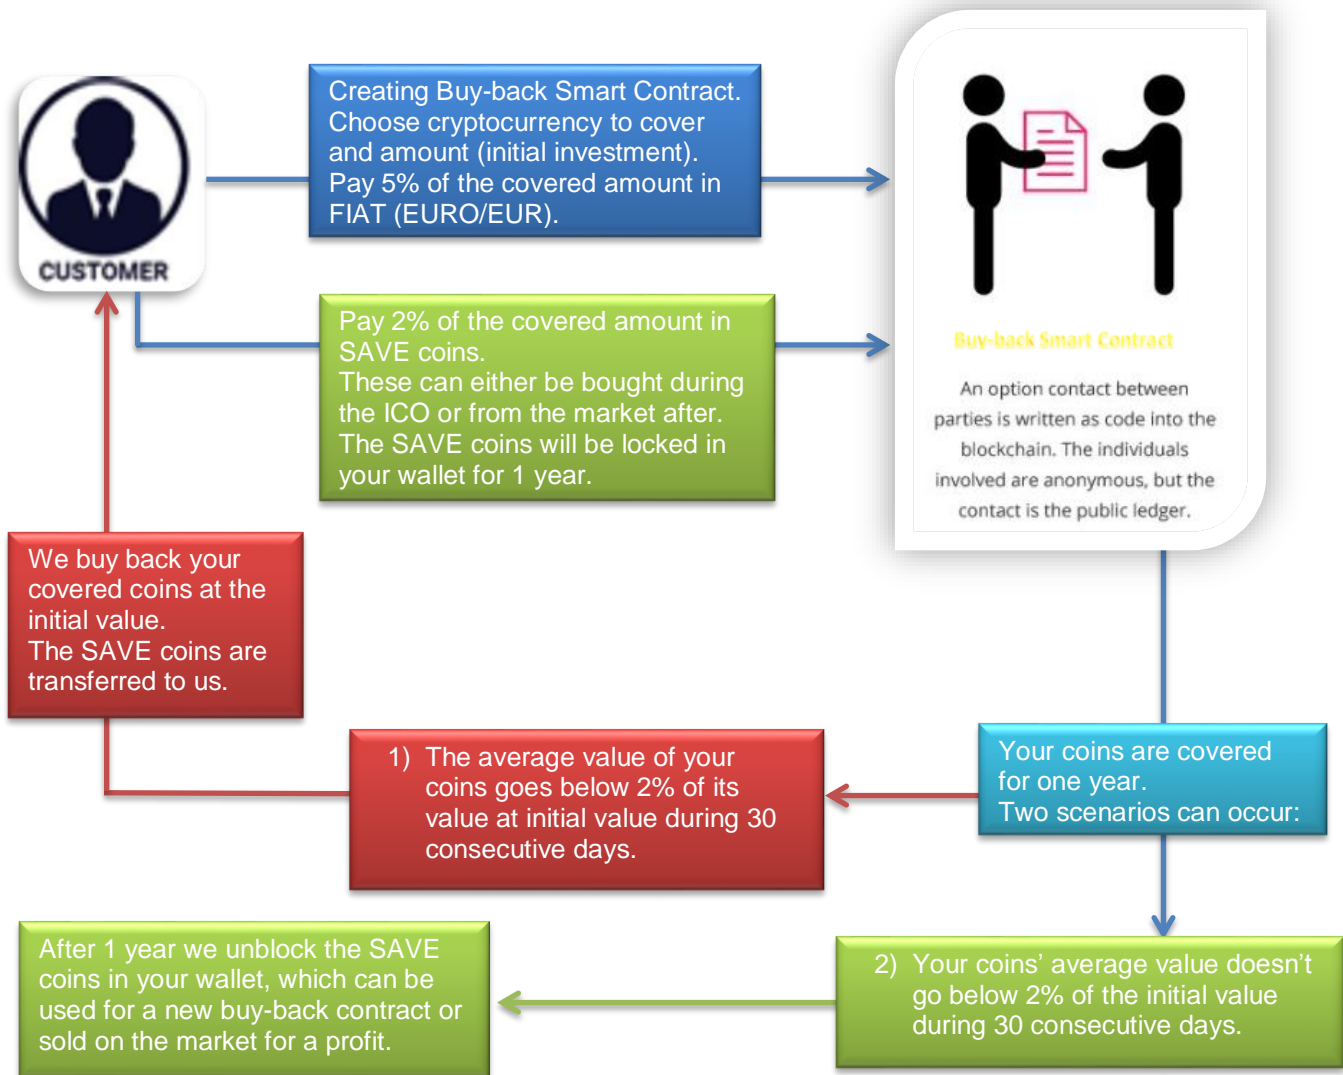

For example: the costs of creating a buy-back contract for €100 worth of cryptocurrencies will be 7€ as below:

- €5 will be paid using fiat (EURO);
- €2 will be paid using SAVE tokens.

The buy-back contract executes automatically if the value of the coins included in the buy-back contract for a 30 days period goes below an average of 2% of the initial value.

The SAVE coins you pay for the buy-back contract creation are automatically blocked for one year. There are two scenarios on what can happen with them:

1. The value of coins in the buy-back contract doesn't go below 2% of the initial value for the 1 year buy-back contract duration. You keep the SAVE coins which will unlock, and you can either use it for purchasing a new buy-back contract or sell it on the market for a profit;
2. The coins covered by the buy-back contract do fall below 2% of the initial value for 30 days in average, we buy back the covered coins at the initial value and get the SAVE coins back.

Terms:

Initial value: The value of the coin at the moment the smart contract is created.

Initial investment: The amount of coins to be covered.

ICO Token distribution

SAVE tokens crowdsale will be distributed in two major phases, the first one for Private Presale-ICO, the second one for public ICO split in 4 phases. Within a month after the public crowdsale ends, the SAVE coin will be published on all major exchanges.

A maximum of 350 million tokens will be generated during the ICO – known as a hardcap. No additional tokens will be issued after.

| Allocation | Phase | Duration | Price EURO | Tokens | %Free | Bonus Tokens | Total Tokens | % |
|---------------|-------|----------|------------|-------------|-------|--------------|--------------|-------|
| Pre-Sale | 0 | 4 weeks | 0.1 | 50.000.000 | 10% | 5.000.000 | 55.000.000 | 15.7% |
| Public | 1 | 1 week | 0.15 | 50.000.000 | 5% | 2.500.000 | 52.500.000 | 15.0% |
| Public | 2 | 1 week | 0.15 | 50.000.000 | 4% | 2.000.000 | 52.000.000 | 14.9% |
| Public | 3 | 1 week | 0.15 | 50.000.000 | 3% | 1.500.000 | 51.500.000 | 14.7% |
| Public | 4 | 1 week | 0.15 | 50.000.000 | - | 0 | 50.000.000 | 14.3% |
| Reserve fund* | - | - | - | 89.000.000 | - | - | 89.000.000 | 25.4% |
| TOTAL | - | - | - | 339.000.000 | - | 11.000.000 | 350.000.000 | 100% |

*Any unsold tokens in the private and public phases will remain in the reserve fund and will be locked for a period of time.

The approximate timeline* for the ICO phases are:

- Pre-Sale phase: 23 February – 23 March 2018
- Pause between Private and Public phases: 24 March – 21 April 2018
- Public phase 1st week: 22 - 30 April 2018
- Public phase 2nd week: 1st – 8 May April 2018
- Public phase 3rd week: 9 – 17 May 2018
- Public phase 4th week: 18 – 25 May 2018

*Timeline is subject to change depending on meeting the Private and Public goals.

Distribution of funds raised during the ICO crowdsale

50% of the funds raised during the ICO crowdsale will be used to build the buy-back smart contract platform and blockchain, mobile and web wallet.

15% of the funds will be used for marketing, advertising and advertorials to promote it and ensure its success.

Please see the below chart to see how all funds will be used:

Roadmap

Q4 – 2017

Concept Development:

- White Paper;
- Web site development;
- Roadmap.

Q1 – 2018

SAVE token ICO:

- Prepare & launch SAVE token ICO (website and smart contract) to begin the crowdsale process;
- The development team will start to work to implement the initial prototype of the SAVE Token.

Q2 - Q3 - 2018

Services & Projects Announced:

- Finalize the possible services (payment solutions & buy-back smart contract), projects (web wallet, mobile wallet) and third party tools, which will be used along with the SAVE token.

Q3 – 2018

Testing Performance of Coin

- SAVE Token performance testing starts by development team;
- Testing the smart contract.

Q3 – 2018

Coin Testnet Development Started:

- Development team is looking into a test-net development to make sure everything works fine during development stage.

Q3 - Q4 – 2018

Buy-back platform launch:

- Launch the fully functional buy-back website and smart contract.
