

The SAVE Proposal – One Pager

The problem

The blockchain represents one of the biggest innovations of the information age. As a result, we have seen a lot of money being invested directly in the form of trading, hence the spectacular price increase of bitcoin over the year 2017, and indirectly invested into the expansion of the blockchain. This has sparked the appearance of a plethora of blockchain-based solutions to existing platforms. All these new solutions show great potential to revolutionise the WEB via blockchain-based ecommerce platforms, app stores, music apps, PR agencies, social media, financial services and so much more. These applications of the blockchain have brought innovations towards a decentralised economy.

However, considering the risk imposed by rumours about regulation by governments, many potential investors are reticent to learning about the benefits of the blockchain technology and as a result, reticent to investing into cryptocurrency.

Our solution

We, the SAVE team, are proposing a revolutionary system of protecting your investment into cryptocurrency. Our solution offers benefits to every stakeholder interested to invest.

Benefits of users

By offering a buy back system for cryptocurrency we aim to attract new investors who will have their investment secured in case of market collapse. Our customers are either first time investors who would like to take advantage of the extraordinary profits offered by crypto market but do not want to risk. They pay for the policy in both FIAT and SAVE.

Benefits of investors

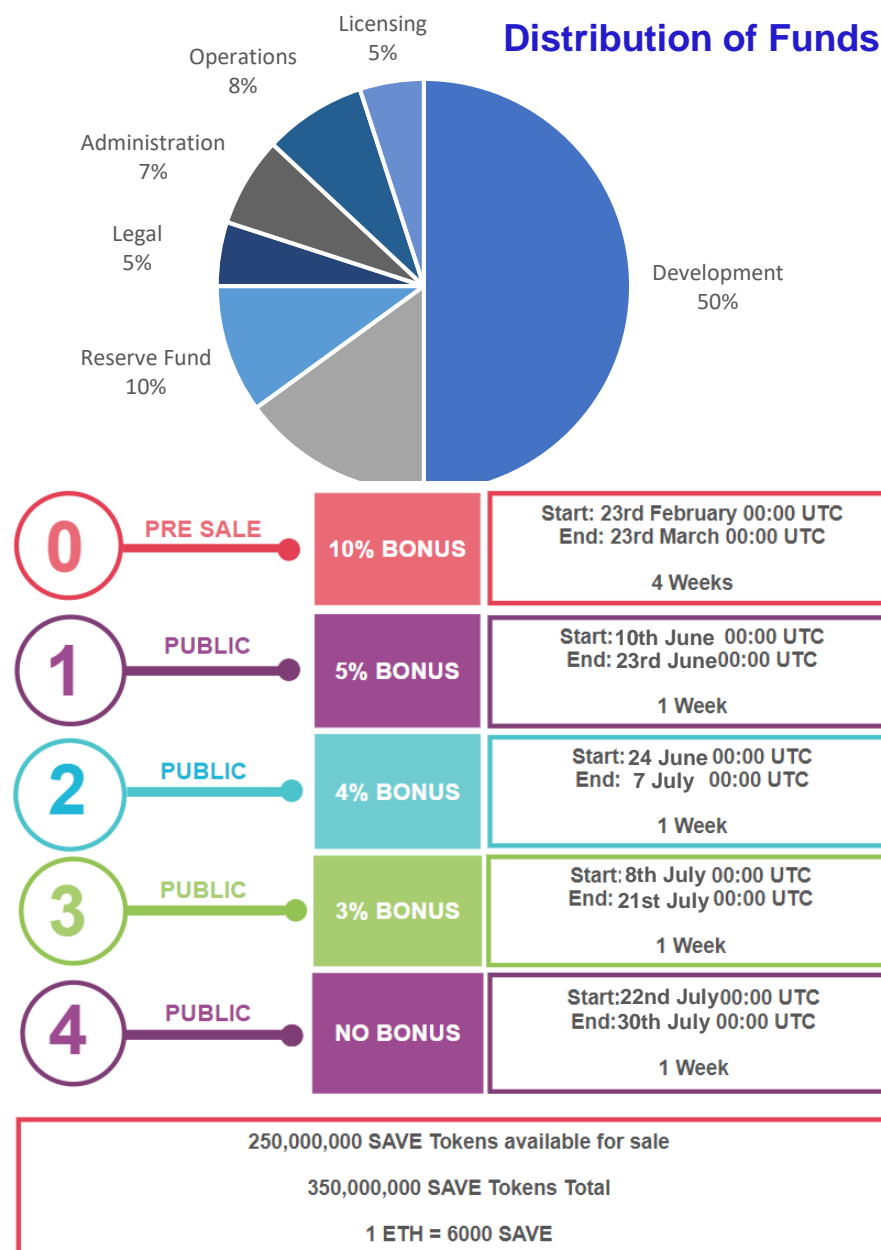

We will ask 2% SAVE token to secure the investment. The SAVE will be bought by our customers on the market, at the market price.

Furthermore, we will not dilute the market, hence the number of SAVE tokens on the market will be finite and increasing with the demand. Early investors will benefit of from the rising prices.

ICO – Initial Coin Offering

The ICO is aimed at raising funding for the development of the platform.

SAVE
FIRST BUY BACK SYSTEM FOR CRYPTO INVESTMENTS

- CHOOSE THE CRYPTOCURRENCY YOU WANT TO PROTECT
Bitcoin, Ethereum, Litecoin, etc.
- CHOOSE HOW MUCH YOU WANT TO PROTECT
AMOUNT IN CRYPTO = EURO
- PAY FOR THE POLICY CREATION:
